

6300-CX LTE Router: Finance/ATM Terminal

The Accelerated 6300-CX ensures (Primary or Fail-Over) the best data connection performance when using 4G LTE data at a stand-alone ATM Terminal. Challenges may include the inability for a land line connection or the ATM location is in an area with poor 4G LTE data reception. By using our 6300-CX, you can perform your own site survey using our convenient temporary battery backup. Locate a great 4G LTE Data signal, mount your 6300-CX and run standard Ethernet (up to 300 feet with CAT 6) back to your ATM. Avoid costly site surveys and connect your ATM for a great 4G LTE data connection.

ATM Terminal:

Connected Devices

- Point of sale
- Credit card terminal
- Security cameras

Temporary Battery Pack

Included battery for site survey to identify optimal signal strength placement

Accelerated View[™]

Enterprise cloud management suite
